Codonics Horizon Operating Software

Version 2.1.1 Release Notes

Summary

Version 2.1.1 software provides support for a new type of Smart Card for all Codonics Horizon® Imagers.

The Smart Card is the component that provides licensing, configuration and feature information to the Horizon Imager.

The most recent domestic software version for Horizon Imagers was 2.0.0. The most recent international software version for Horizon Imagers was 2.1.0. Version 2.1.1 software unifies all Codonics Horizon Imagers to use one common software version along with the new type of Smart Card.

Products Affected

This software upgrade and new Smart Card applies to all newly manufactured Horizon Imagers.

The Imager Software Version can be determined using the Control Panel by viewing the Imager Info screen from the Utilities menu.

Technical Support

If problems occur during software installation, contact Codonics Technical Support between the hours of 8:30AM and 5:30PM EST (weekends and U.S. holidays excluded).
