Level-0 Reset

Overview

The Codonics NP-1600 provides a utility that aids in restoring the unit to factory default settings. This helps users who are unsure how they may have changed the settings, System Administrators who must manage a unit that has been modified by multiple users, and sales personnel who want to make sure that a demonstration unit is in the proper state before entering a customer site. The Level-0 Reset feature is also useful for System Administrators or sales personnel who have forgotten the root password on units where one was installed.

Level-0 Reset

Level-0 Reset restores many printer settings to the factory defaults.

Primary Functions:

◆ Clears all print queues.
◆ Resets all network parameters to factory default values.
◆ Restores the IP address to factory default (192.0.2.0) in the host file.
◆ Clears the system directory:
  ◆ Restores root (printer default) image processing parameters.
  ◆ Removes user-defined image processing parameters.
◆ Resets parallel port parameters to factory defaults.
◆ Deletes all files from data partition of hard drive: **/data/tmp** and **/data/parallel** directories.
◆ Removes all passwords, including any root password, and resets **passwd** file to factory default.
◆ Clears log files.
◆ Removes all **core** files on the hard drive.

Note: Level-0 Reset does **not** affect any Activation Keys. Refer to the <u>Activation Keys Technical Brief</u> for information on removing Activation Keys.

Front Panel Sequence

Use the following front panel key sequences to perform a Level-0 Reset of the printer. When an **<Up-arrow>** or **<Down-arrow>** is indicated, press the key repeatedly until the correct response is showing on the LCD. Start from the READY display.

Use Key	Until LCD Displays
<Setup>	SETUP: NETWORK
<Up-arrow>	SETUP: KEYS
<Setup>	KEY:
Enter Key Code: **R 0 _ _ _ _ _ _ _ _**	*Where the _ characters represent blank spaces.*
<Up-arrow> *or* **<Down-arrow>**	*To change 1st. letter of activation key.*
<Setup>	*Move to next letter of activation key.*

Repeat the use of arrow and setup keys until all letters are entered. After the last letter of the key is entered, the LCD will display:

	SETUP: KEYS
<Up-arrow>	SETUP: EXIT
<Setup>	READY

After the Level-0 Reset Key has been installed and the printer's front panel displays READY, cycle power **off** for 5 seconds then **on** to reboot.
